

Resolution NO. 2024- 8

A Resolution to Adopt the Professional Engineering Report for Philipsburg's Stormwater System (PER)

Whereas The Town Council of Philipsburg held a hearing to review the final Stormwater PER on August 22, 2024 in the Town Hall at 6 p.m. The hearing was advertised in the Philipsburg Mail newspaper on August 7th and August 14th, 2024.

Whereas The Town Council received no public comments.

Whereas The Town Council reviewed the draft document with Public Works and Great West Engineering at a work session previous to this hearing, and had no substantive changes.

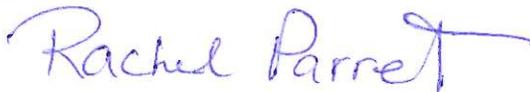

Whereas The Town Council notes that previous stormwater engineering and planning had occurred in past decades, and is found in previous wastewater system PER's, this PER to be adopted is comprehensive and deliberative.

Whereas The Town Council also notes that this PER was funded by grants from the State of Montana. This PER is considered to be comprehensive of the existing systems.

Therefore Be It Resolved that the Town Council adopts this PER Stormwater, dated August 24, 2024 as planning advice, and a vehicle to seek funding for repair of the system at the Town Council meeting on September 3, 2024.

By: Daniel Reddish
Mayor the Town of Philipsburg

Attest: Rachel Parret
Clerk and Treasurer of the Town of Philipsburg
